The graphs illustrate the ratio of flies aggregated on favorable versus unfavorable sites over time. The graphs show data for different strains and conditions:

- **ca**
- **bv**
- **GC 207 ca: HS**
- **GC 253 bv**
- **hsp-GC, GC207 ca: H.S.**

In the lower graph, the number of flies is depicted for different treatments:

- **grape juice**
- **grape juice/quinine**

The bars for each treatment show the number of flies over time.
