Concentrations of [GNTI]_plasma (← left axis) and [JDTic]_brain (→ right axis) are shown as a function of time after antagonist administration (days). Latency after U50,488H (sec) is also plotted on the right axis. Antagonism by [GNTI]_plasma and [JDTic]_brain is noted with respective symbols. Concentrations of [Nor-BNI]_plasma and Saline are also indicated. The y-axis represents C_t/C_{max} (%) and the x-axis represents time after antagonist (days).
