Fig. 4. *RPT5b*<sup>Ws</sup> cDNA is partially mis-spliced, regardless of *RPT5a* status. A, 5-day old seedlings grown on vertical agar plates from wild type *RPT5a* plants and *rpt5a2/rpt5a2* and *rpt5a3/rpt5a3* in either *RPT5b*<sup>Col-0/RPT5b*Col-0* or *RPT5b*<sup>Ws-4/RPT5b*Ws-4* background. B, Percentages of *RPT5b* intron 7 missplicing in the same plantlets as in A. At least 100 cloned cDNAs were tested per genotype.
