**Supplementary Figure S6. GUS expression in 35S:DIR1^{Δ1-25}-GUS-17/dir1-1 leaves.**

35S:DIR1^{Δ1-25}-GUS-17/dir1-1 was left untreated, mock inoculated or inoculated with 10^6 cfu ml^{-1} of avirulent *Pst avrRpt2* and harvested for histochemical GUS analysis at 20 hpi. Midveins and mesophyll cells of untreated, mock inoculated, inoculated and systemic leaves were processed and photographed. Relative GUS staining was scored according to the scale in Figure 1B.
