Figure 1 – Delphi study overview.

**Definition of Problem**

What information do cardiac rehabilitation experts believe should be provided to, and received from all users of a Internet-based Outpatient Cardiac Rehabilitation Program.

**Selection of Experts**

Experts in the area of cardiac rehabilitation. Conference participation list and E-mail snowballing method to invite participants (n=52).

**Delphi Round 1**

Web-based 11 item open-ended questionnaire (n=44). Content analysis to identify indicators for each question.

**Delphi Round 2**

Participants score agreement for indicators on a 5 point Likert scale (n=43). Response analyses for consensus.

**Delphi Round 3**

Participants rescore agreement for indicators on a 5 point Likert scale (n=43) in light of the group response.
