Comatose patients after cardiac arrest
N = 97

Combination 1
Prediction based on EEG-clinical criteria only:
> 1 Unfavourable variables *
N = 38

Combination 2
Prediction based on EEG-clinical criteria and NSE
> 1 Unfavourable EEG-clinical variables
or NSE ≥ 97 ng/mL
N = 51

Combination 3
Prediction based on EEG-clinical criteria, NSE and SSEPs
> 1 Unfavourable EEG-clinical variables
or NSE ≥ 97 ng/mL
or Unfavourable SSEPs
N = 63

Poor outcome N = 38
Poor outcome N = 51
Poor outcome N = 63
