General practice, n=2350 patients

Overall population

≥ 50 years n=862

Current smokers n=139

History of smoking n=183

≥ 55 years n=696

≥ 65 years n=359

Non-adequately treated hypertension n=54

Non-adequately treated hypertension n=54

Using the PREVALENT clinical prediction model

Initial screening by ABI measurement

ABI<0.9 n=138

Time≈244 hours initially

Time≈49 h/year for a 5-year repeated measurement

ABI<0.9 n=61

Time≈39 hours initially

Time≈11 h/year for a 5-year repeated measurement
