Systolic torsion (deg)

40 30 20 10 0

Diastolic untwisting velocity (deg/s)

0 -100 -200 -300

Exercise systolic torsion (deg)

During submaximal exercise

r=-0.66, p<0.001 for entire cohort
r=-0.56, p<0.001 for patients (solid circles)
r=-0.74, p<0.001 for controls (empty circles)
