Effect of enhancers in RetroNectin®-mediated transduction

A

Effect of dilution of the retrovirus vector MLV-CX43-EGFP on efficiency of transduction

B

Effect of enhancers in RetroNectin®-mediated transduction

C

Fraction of EGFP-positive skeletal myoblasts during passaging in tissue culture

D

Effect of dilution of the retrovirus vector MLV-CX43-EGFP on efficiency of transduction

E

Fraction of EGFP-positive cells, %

Counts

Intensity of green fluorescence

45 kDa
