Journal of
Experimental and
Clinical Virology

*Journal titles based on PubMed database [34]
†Journals registered in the databases, which had been published on the Web in February 2008
‡Checked on January 27, 2009
§Shown in Figure 1
¶Information about languages was from the PubMed database [34] and the National Library of Medicine (NLM) Catalog [44] of the National Center for Biotechnology Information. In the case of including English and other languages, such as German, French, Japanese and Chinese, the former was the main language
#Journal titles were from the PubMed database [34]
**Journals marked in the column were equal to those registered in the ‘Infectious Disease Category’ of the Science Citation Index Expanded™, except for 8 journals (total 56 journals registered in the category on January 27, 2009). The 8 journals were: Canadian Journal of Infectious Diseases & Medical Microbiology, which ended publication in 2004, Infection Genetics and Evolution, which started in 2001, Infections in Medicine, for which almost no articles were registered in the PubMed database, Revista Chilena de Infectologia, articles from which have been registered in the PubMed database since 2005, Sexual Health, which started in 2004, the Southern African Journal of HIV Medicine, full text articles from which have been found since 2004 in the PubMed database, Transboundary and Emerging Diseases, and Zoonoses and Public Health, which started in 2008 and 2007, respectively.
††Journals which have print version only or both print & electronic versions
‡‡Journals which have an electronic version only
