Round 1 \((N = 44)\)

**Input**

89 factors

**Questionnaire**

3 x 89 questions on factors’ importance for adoption, implementation and continuation

(10-point Likert scale)

89 questions on factors’ changeability

(10-point Likert scale)

**Data analysis**

Median ≥ 8

Highest mean scores for each stage:

- Adoption ≥ 7.64
- Implementation ≥ 7.70
- Continuation ≥ 7.76

Median ≥ 6

Interquartile range ≤ 2

Round 2 \((N = 36)\)

**Questionnaire**

Select top-10 most important factors out of:

- 18 factors important for adoption
- 23 factors important for implementation
- 24 factors important for continuation

37 questions on factors’ changeability

(10-point Likert scale)

**Data analysis**

Sum of points based on top-10 ratings:

- #1 = 10 points
- #2 = 9 points
- #3 = 8 points etc.

Median ≥ 6

Interquartile range ≤ 2
