FIGURE 2. Proposed Algorithm for diagnosis of frailty in primary care based on age and walking speed

PERSONS ≥ 65 YEARS
FRAILTY 10.4%

PERSONS ≥ 75 YEARS
FRAILTY 1.4%

NO (48.5%)
FRAILTY 1.4%

YES (51.5%)
FRAILTY 19%

WALKING SPEED <0’8m/s

NO (21.4%)
FRAILTY 0.3%

YES (30.1%)
FRAILTY 32.1%

FRAILTY SCREENING (5 criteria)

(*) The proportions of population and frailty are calculated using the study results and weighted data by age and sex for the reference population.
