Panel A: Graph showing the 4kD FITC-Dextran (ug/ml serum) levels for GC-C^+/- and GC-C^-/- genotypes compared to Naive and Day 4 conditions. The graph includes data points and error bars indicating statistical significance.

Panel B: Images showing Claudin 2 and Claudin 3 expression in GC-C^+/- and GC-C^-/- genotypes.

Panel C: Western blot images of Claudin 2, Claudin 3, and βTubulin expression in GC-C^+/- and GC-C^-/- genotypes.
