Referred to study
n=38

Lived too far away n=2
Residential care n= 2
Severe visual, physical or neurological impairment n=5
Severe cognitive impairment (MMSE <12) n=1
Declined to participate n=6

Dyad (carer + person with dementia) randomised
n=22

Intervention
n=11 dyads
(Carers: 6 spouses, 5 adult children carers)

Completed 12 weeks fall data
n= 11
Follow up assessment n=10
(1 person in hospital)

Control
n=11 dyads
(Carers: 8 spouses, 3 adult children carers)

Completed 12 weeks fall data
n= 11
Follow up assessment n= 11
