The graph depicts the proportion of positive samples (%) for various respiratory viruses across different age groups. The x-axis represents age in years, ranging from 0 to 15, while the y-axis represents the proportion of positive samples in percentage. The viruses represented include ADV (adenovirus), RSV (respiratory syncytial virus), IFA (influenza A virus), IFB (influenza B virus), PIV (parainfluenza virus), hMPV (human metapneumovirus), and picorna. Each virus is represented by a distinct line and symbol on the graph.
