Update tool

epiPATH
Molecular Epidemiology Database for Infectious Pathogens

Update Data Tool

This tool provides a web interface to update data in the epiPATH database. To update data, you must have permission to update. If you do not have this permission, please contact your system administrator. Due to database security reasons, you can update a single record at a time.

INSTRUCTIONS:

You should select the name of the database table, the field name at the table to which your value belongs, the ID (identification value in the table) of your record, and the new value you want to update. How to fill in the IDs.

UPDATE:

Select a table to update (Choose one)

Select a field to update (Choose one)

ID1: [ ]
ID2: [ ]
ID3: [ ]
ID4: [ ]
New Value:

Update Clear
