N = 6213
Subjects enrolled, randomised and vaccinated

N = 6203
Total Cohort for efficacy and safety
  • 10 ID numbers assigned to the same 4 subjects who were vaccinated several times.

Placebo N = 2066
Total Cohort for efficacy and safety

Vaccine N = 4137
Total Cohort for efficacy and safety

Placebo N = 2003
ATP efficacy cohort Influenza Season
  • Protocol violation (inclusion/exclusion criteria): 1 subject
  • Underlying medical condition forbidden by the protocol: 25 subjects
  • Subjects not exposed during the influenza season: 37 subjects

Vaccine N = 4011
ATP efficacy cohort Influenza Season
  • Protocol violation (inclusion/exclusion criteria): 1 subject
  • Underlying medical condition forbidden by the protocol: 53 subjects
  • Subjects not exposed during the influenza season: 72 subjects

N = 960
Total Cohort Subset

Placebo N = 320
Total Cohort Reactogenicity Subset

Vaccine N = 640
Total Cohort Reactogenicity Subset

Placebo N = 315
ATP Cohort Immunogenicity Subset
  • Underlying medical condition forbidden by the protocol: 5 subjects

Vaccine N = 632
ATP Cohort Immunogenicity Subset
  • Underlying medical condition forbidden by the protocol: 8 subjects
