Figure 2: Kaplan Meier survival curves in patients on dialysis in Ethiopia

- Kaplan Meier survival curves with comorbidity vs. no comorbidity:
  - Comorbidity: $P = 0.721$
  - No comorbidity: $P = 0.818$
  - With comorbidity: $P = 0.002$

- Vascular access:
  - Vascular graft: $P < 0.0001$
  - AV-Fistula: $P = 0.778$

- EPO given vs. not given:
  - EPO given: $P = 0.002$
  - EPO not given: $P = 0.411$

- Creatinine level at dialysis initiation:
  - $\geq 10$ mg/dl: $P = 0.721$
  - $< 10$ mg/dl: $P = 0.411$

- Haematocrit at 3 months post dialysis:
  - $< 30\%$: $P < 0.0001$
  - $\geq 30\%$: $P = 0.778$

- Blood transfusion given:
  - $< 10$ mg/dl: $P = 0.721$
  - $\geq 10$ mg/dl: $P = 0.411$
