The diagram shows the distribution of normal and increased LVMI (left ventricular mass index) across different stages of CKD (chronic kidney disease). The percentages are as follows:

- **CKD 2**:
  - Normal LVMI: 1%
  - Increased LVMI: 99%

- **CKD 3**:
  - Normal LVMI: 7%
  - Increased LVMI: 93%

- **CKD 4**:
  - Normal LVMI: 10%
  - Increased LVMI: 90%
