**Figure 1**

**A** and **C** show the changes in iFGF23 and cFGF23 levels over time, respectively, with Lanthanum carbonate (open squares) and Placebo (filled diamonds). The x-axis represents the weeks of the study, and the y-axis shows the levels of the respective factors in pg/ml.

**B** and **D** display the change from baseline in LS mean iFGF23 and cFGF23 levels, respectively, with Lanthanum carbonate (open squares) and Placebo (filled diamonds). The x-axis represents the weeks of the study, and the y-axis shows the percentage change from baseline.

*Note: Significant differences are indicated by asterisks: *p < 0.05 and **p < 0.01.*
