The graph shows the concentration of Ang-1 (ng/ml) over days post-subarachnoid hemorrhage (pSAH) for different groups.

- **Ischemia** group
- **No ischemia** group
- **Healthy controls** group

The y-axis represents the concentration of Ang-1, ranging from 50 to 200 ng/ml. The x-axis represents the days post-subarachnoid hemorrhage, ranging from HC to 15.

Significance is indicated by ***,**.
