Invitation to participate in the full study

Exclusion:
- Age <18
- Suicidal ideation
- CES-D < 12
- No access to internet

Baseline assessment T0

Glioma patients:
Randomization

Intervention
- Assessment T1: After treatment
- Assessment T2: 12 weeks

3 month waiting list
- Assessment T1: 6 weeks
- Assessment T2: 12 weeks

Haematology patients:
Intervention
- Assessment T1: After treatment
- Assessment T2: 12 weeks

After treatment
- Assessment T3: After treatment
- Assessment T4: 12 weeks

Intervention
- Assessment T5: 6 months
- Only grade III or IV glioma patients

Assessment T4: 12 months

Assessment T3: 6 months
Only grade III or IV glioma patients

Assessment T6: 12 months
