Total population  
\( n = 65,550 \)

Total births prior to the intervention,  
\( n = 19,407 \)

Total births during the intervention,  
\( n = 46,143 \)

Reports of DFM prospectively registered in singleton third trimester pregnancies prior to the intervention,  
\( n = 1370 \)

Reports of DFM prospectively registered in singleton third trimester pregnancies during the intervention,  
\( n = 3534 \)

Excluded  
Recurrent visits, gestational age < 28 weeks, fetal deaths not initially identified by DFM and multiple pregnancies,  
\( n = 128^* \)

Excluded  
Recurrent visits, gestational age < 28 weeks, fetal deaths not initially identified by DFM and multiple pregnancies,  
\( n = 439^* \)

Baseline cohort  
Reports of DFM prospective registered in singleton third trimester pregnancies,  
\( n = 1215 \)
Lost to follow-up,  
\( n = 27 \) (2.2%)

Intervention cohort  
Reports of DFM prospective registered in singleton third trimester pregnancies,  
\( n = 3038 \)
Lost to follow-up,  
\( n = 57 \) (1.9%)
