Neonatal tests
Skin fold thickness
Ponderal index
Mid-arm circumference/head circumference ratio
Customised birthweight
Birthweight for gestational age
Other neonatal measures of malnutrition
Hypoxic ischaemic encephalopathy
Abnormal cord pH at birth
Abnormal Apgar scores
Admission to NICU
NICU scoring systems e.g. Clinical Risk Index for Babies (CRIB), Score for Neonatal Acute Physiology (SNAP)

Childhood outcome measures
Measures of disability
Developmental delay
Learning difficulties e.g. Bayley Scales of Infant Behaviour, Ages and Stages Questionnaires, Autism screening instrument, Battelle Developmental Inventory, National Curriculum Standard Attainment Targets.

Adult outcome measures
Measures of disability
Developmental delay
Learning difficulties e.g. Stanite Scores of Intellectual Performance, General Health and Behaviour questionnaire, Weschler Adult Intelligence Scale
Adult diseases e.g. NIDDM, Cardiovascular diseases

Scoping search: 10,000 citations
Approximately 1500 papers to be assessed in full
2 x 2 tables of individual study results
Pooled diagnostic odds ratios, sensitivity and specificity
GRADE tables of levels of evidence

Publication in peer reviewed journals
Recommendations for clinical guidelines
