Neonatal

Infancy

The lower limit of stillbirths and perinatal deaths.

Defined as birthweight of 500 g or more,

or, if missing, 22 completed weeks of gestation,

or, if missing, body length of 25 cm or more.

The preferred limit for international comparisons.

Defined as birthweight of 1000 g or more,

or, if missing, 28 completed weeks of gestation,

or, if missing, body length of 35 cm or more.

Deviations occurring after the onset of labor, and before

the completion of delivery, are intrapartum stillbirths
