Neoadjuvant chemotherapy  
according to standard therapy protocols  
(e.g. EURAMOS1)

Radiotherapy  
(HIT/PT)  
(60-66 GyE = 20-40d).

Adjuvant chemotherapy  
according to standard therapy protocols  
(e.g. EURAMOS1, HR1 (MAP))

Patient’s registration  
at least 3 weeks before start of HIT/PT

Obligatory diagnostics before HIT/PT:  
- FDG-PET
- CT/MRT
- GK - Tc99 Skeletal scintigraphy week 7-10

Obligatory diagnostics after HIT/PT:  
- FDG-PET week 15 + end of therapy  
- CT/MRI and GK - Tc99 skeletal scintigraphy week 20 + end of therapy

Follow-up diagnostics  
6, 12, 24, 36, 48 and 60 months after HIT/PT
