Supplementary Figure S3: Immunohistochemistry of ccRCC tissue using anti-SAV1 antibody

Representative result of immunohistochemistry using anti-SAV1 antibody is shown. SAV1 protein is downregulated in tumor cells, whereas it is strongly expressed in proximal renal tubules, podocytes, and endothelial cells in normal tissues. Left column; x40, N; normal tissues, T; tumor cells. Middle column; x200, Right column; x400, arrows indicate endothelial cells.
