Gastric adenocarcinoma T3 and/or T4 and/or N+
(Thoracoabdominal CT and ultrasound endoscopy) with indication of curative gastrectomy

+/- Neoadjuvant therapy (MDT decision)

Thoracoabdominal CT scan and laparoscopy with peritoneal washing for cytology (within 3 weeks before inclusion)

Gastric cancer T3 or T4 and/or N+
and/or with positive cytology (Cy+)

Registration and informed consent

Surgery
- Pre-gastrectomy cytology
- Radical gastrectomy
- Post-gastrectomy cytology
- D1-D2 lymph node dissection

+ Randomization

ARM A
- HIPEC
  - Folinic Ac 20mg/m² IVD
  - 5-FU 400 mg/m² IVD
  - Oxaliplatin 250 mg/m² into 2 Liters/m² of G5%

ARM B
- No HIPEC

Metastasis
Pancreas head involvement

Ancillary cytological study
