(A) HuCCT1

Triptolide concentration (nM)

Mcl-1 expression (% of control)

[Graph showing Mcl-1 expression in HuCCT1 cells after treatment with various concentrations of triptolide for 6h and 12h, with statistical significance indicated by ***.]

(B) QBC939

Triptolide concentration (nM)

Mcl-1 expression (% of control)

[Graph showing Mcl-1 expression in QBC939 cells after treatment with various concentrations of triptolide for 6h and 12h, with statistical significance indicated by ***.]

Note: The graphs display the percentage of Mcl-1 expression relative to control, with different concentrations of triptolide (0, 25, 50, 100 nM) and time points (6h, 12h). The significance of the differences is indicated by asterisks (***, indicating p < 0.001).
