Figure 2. Primary data on members of IMPACT cohort will be linked to multiple administrative datasets held at the Institute for Clinical Evaluative Sciences to create a comprehensive cohort of all AYA in Ontario including demographic, diagnosis, treatment, recurrence, outcomes and health services use information.

**Primary Data**
- AYA (15-18) treated at pediatric centres
- POGONIS database
- AYA treated at adult centres
- Chart Abstraction

**Administrative Data**
- Ontario Cancer Registry
- Outpatient Physician Claims
- Emergency Room Claims
- Hospital Discharge Abstracts
- Home care services
- Registered Persons Database

Comprehensive AYA Cohort
n=5,349
