**DEVELOPMENT PHASE**  
(QUALITATIVE METHOD)

- Preliminary version
- Application in a sample of breast cancer patients
- Analysis of internal validity

**VALIDATION PHASE**  
(QUANTITATIVE METHOD)

- Item selection
  1. Distribution of items
  2. Redundancy
  3. Test-retest reliability (items)
- Factorial structure of the questionnaire
  1. Test-retest reliability (dimensions)
  2. Item-scale correlations
  3. Inter-scale correlations
  4. Internal scale consistency
- Analysis of external validity
