Figure 1: Boxplots illustrating the distribution of subscale scores by glaucoma severity (in better eye)

Factor 1: Seeing Functions: Participation

Factor 2: Moving Around & Communication

Factor 3: Emotional Function

Factor 4: Walking around Obstacles

Factor 5: Light

Factor 6: Seeing Functions: Domestic & Social Life

Factor 7: Mobility

X axes labels: 0=ocular hypertension (MD≥0); 1=mild glaucoma (0>MD>-6dB); 2=moderate glaucoma (-6dB>MD>-12dB); 3=severe glaucoma (MD≤-12dB)

Y axis scale indicates increasing level of functional impairment or difficulty performing activities: 1= no functional impairments or difficulty performing activities
