Reminders for the paediatrician

Identify
Scan the KLIK PROfile at the current date. Which colour dominates?
In which domain do you identify problems?
For which items do you identify problems?
Is there improvement or deterioration compared to the previous assessment?

Graphs: How is the child doing compared to healthy peers?

Discuss
Discuss the KLIK PROfile at a convenient moment during the consultation
Use the KLIK PROfiles as a guide or supplement during the consultation
Frequently ask the patient for confirmation
Open the discussion with, e.g.: ‘I see that you reported that …’
Discuss the red and orange answers. Use the decision tree as a guide
If the answers are (almost) all green, ask for confirmation
If there are a lot of red and orange answers, discuss the domains only
Check if the child or parent wants to discuss topics other than those on the KLIK PROfile
Summarize the most important issues

Take action
Take action when asked for help
Come back to this action at the next consultation
