Qualitative case study analysis plan based on the pattern matching approach by Trochim [23]

**Theoretical Realm**
- Theories
- Ideas
- Hunches

Clinical experience - young people are not adhering to treatment at transition to adult services

**Conceptualise Task**

**Systematic review to develop theoretical framework and propositions**

Data collection:
- Interviews/small groups/focus groups
- Documents, clinical guidelines and artefacts in 2 cases

**Theoretical pattern**

**Pattern matching**

**Observed pattern**

Expected pattern shown in theoretical framework and propositions

- Observed pattern in thematic analysis of interviews/small groups and focus groups and content analysis of documents, clinical guidelines and artefacts in 2 cases

**Organise data**

**Observational Realm**

Findings:
- Observation
- Themes
- What worked, for whom, how and in what context

Comparison by and within each case

Further analysis using theory based evaluation to find out what works, for whom, how and in what context
