Figure 1 Study design.

- Enrollment:
  - Children and adolescents (4-17 years) and their parents assessed for eligibility
  - Excluded:
    - Not meeting inclusion criteria
    - Declined to participate
    - Other reasons
  - Baseline assessment (SDQ and KIDSCREEN)
  - Randomization stratified by department and age of child or adolescent

- Allocation:
  - Allocated to feedback condition 1: One and a half months measurement (SDQ and KIDSCREEN)
    - Feedback to clinician: regarding symptoms and quality of life of the client
    - Quarterly measurements (SDQ and KIDSCREEN)
    - Measurement at end of treatment (SDQ, KIDSCREEN, TSM and Jeugdthermometer)
  - Allocated to feedback condition 2: One and a half months measurement (SDQ, KIDSCREEN, and TSM)
    - Feedback to clinician: feedback from condition 1 PLUS feedback regarding possible obstacles and suggestions to improve treatment
    - Quarterly measurements (SDQ, KIDSCREEN, and TSM)
    - Measurement at end of treatment (SDQ, KIDSCREEN, TSM and Jeugdthermometer)
  - Allocated to feedback condition 3: One and a half months measurement (SDQ, KIDSCREEN, and TSM)
    - Feedback to clinician: feedback from condition 2 PLUS case consultation with colleagues
    - Quarterly measurements (SDQ, KIDSCREEN, and TSM)
    - Measurement at end of treatment (SDQ, KIDSCREEN, TSM and Jeugdthermometer)
