Data collection

Debriefing sessions with the data collection team
- Discussing emerging themes and impressions of participants
- Developing questions and probes for the topic guides to enhance and focus data collection

Grounded theory analysis: immersion in the data
- Breaking down the data into meaningful groups of words (‘micro level coding’) or sections (‘macro level coding’)
- Relating concepts to each other (‘axial coding’)
- Analytical tools
- Writing memos

Transcription and translation of FGD and interview recordings
