Screened in epidemiological survey (n = 71)

Not meeting inclusion criteria (PTSD) (n = 40)

Eligible for treatment study (n = 31)

Refused to participate (n = 0)

Random assignment of children using a coin flip

Allocated to NET (n = 16)
Received allocated intervention (n = 16)

Allocated to MED-RELAX (n = 15)
Received allocated intervention (n = 15)

1-month post-test/6-month follow-up

Lost to post-test (n = 0)
Lost to follow-up (n = 0)
Discontinued intervention (n = 0)

Lost to post-test (n = 0)
Lost to follow-up (n = 1)
- Moved and could not be relocated
Discontinued intervention (n = 0)

Analysis

Allocated to NET (n = 16)
Analyzed (n = 16)
Excluded from analysis (n = 0)

Allocated to MED-RELAX (n = 15)
Analyzed (n = 15)
Excluded from analysis (n = 0)
