Study population – asked to fill in a short questionnaire indicating risk of COPD (Approx. 8000)

Responders (Expected: 60% of 8000 = 4800)

Subjects at risk of COPD (Expected: 60% of 4800 = 2880)

Subjects undergoing spirometry (Expected: 60% of 2880 = 1728)

Subjects diagnosed with COPD (Expected: 25% of 1728 = 432)
