Public Health in Skåne 2004

Take part and influence the design of future healthcare in Skåne!

How can we improve our preventive work?

How can health be improved in Skåne?

You are one of the people in Skåne who have been invited to take part in this survey. The aim is to increase our knowledge about the health and environment of Skåne residents. The questionnaire you have received includes questions about your health status and factors that are of importance with regard to health.

Why is it important that you answer the questionnaire?
We are conducting this survey in order to obtain a current picture of the health and healthcare contacts of Skåne residents, and of the living and environmental conditions that will be important to future public health in Skåne. Your participation is voluntary. For the results to be accurate, it is important that as many people as possible respond to the survey. When you answer the questionnaire, you make everyone else’s participation more meaningful. Your answers will help us in our efforts to formulate various measures to promote health and prevent illness, and to improve health and medical care in Skåne. That’s why your responses are very important.

What will happen with your responses?
Naturally your identity and any information about you will be carefully protected and kept secret. All the information that we compile will be presented in table form, making it completely impossible to identify any one individual.

Any questions?
The Department of Social Medicine is responsible for the survey, but Statistics Sweden has been tasked with disseminating and collecting the questionnaires and compiling the results. If there is anything you would like to discuss with us in connection with filling out the form or about the survey otherwise, please feel free to ring us at one of the telephone numbers listed on the next page.

Sincerely,

Kent Karlsson

MORE ABOUT THE SURVEY

In order to reduce the number of questions in the survey, population register data such as age, country of birth and citizenship will be obtained from Statistics Sweden’s Total Population Register. Information about education levels, occupations and incomes will be obtained from other Statistics Sweden registers. Statistics Sweden will also assign a code to enable various geographical breakdowns. Information concerning doctors’ visits, hospital stays and sick leaves will be obtained from the County Council’s databases and the Swedish National Social Insurance Board.

Your answers will be protected under the Swedish Confidentiality Act (SFS 1980:100, Chapter 9 § 4) and the Swedish Personal Data Protection Act. This means that everyone who works on the survey will be subject to a confidentiality obligation, and that the gathered data will be presented in tables from which no one individual’s answers can be determined. The number at the top of the form will be used to enable Statistics Sweden to determine who has responded and who should receive a reminder.

All identifying information will be removed before Statistics Sweden delivers the material to the Department of Social Medicine. To enable us to follow up the health situation in the future, Statistics Sweden will keep a “key” linking the names and the questionnaire serial numbers for the next 10 years. Only affected Statistics Sweden personnel will have access to these data.

If you have any questions about the survey (background, purpose, how to answer the questions etc.), please feel free to ring: Viveca Flodén, Department of Social Medicine, University Hospital MAS, tel. +46 040-33 28 74 between 1 pm and 2:30 pm, or send an e-mail to fhs2004@skane.se.

If you have any questions about the actual data-gathering process, please feel free to ring: Statistics Sweden, tel. +46 019-17 60 65, or send an e-mail to fhs2004@scb.se.

How to fill out the questionnaire

Answering the questions will take about 20-30 minutes. The answers will be registered by machine, making it important to fill out the questionnaire in the right way.

• Use a good ballpoint pen with black or dark blue ink. Avoid pencils.

• Tick the boxes that you feel best apply to you. Keep the tick marks inside the boxes, if possible.

Like this

NOT this:

• If you tick the wrong box, fill it in entirely with ink.

Like this

The machine will not be able to read it. Now tick the correct box.

Response time

We would greatly appreciate it if we could receive your completed questionnaire within one week.

Response envelope and postage

Send the questionnaire back in the enclosed envelope. The postage is pre-paid.

Thanks for your cooperation!

**Question 124**

To help you determine how good or bad your health status is, we have provided a thermometer-like scale to the right. On the scale, your best conceivable health status would rate 100, while your worst conceivable health status would rate 0.

Please mark this scale to indicate how good or bad your health status is in your own assessment. Do this by drawing a line from the box below to the point on the scale that indicates how good or bad your current health status is.

Your current health status

---

**Question 125**

Imagine finding out that you have 10 years left to live. You are also given a choice between living those 10 years with your current health status or dying one or more years earlier in order to instead live a shorter time in full health.

Put an X on the line to indicate the number of years with full health you think would be equivalent to living for 10 years with your current health status.
