Questionnaire

You have been invited to participate in a survey about health behavior among students from the city of São Paulo. This questionnaire mainly brings up questions about leisure, family, and the use of substances.

Don’t write your name on the questionnaire because it is ANONYMOUS. It means that we are not allowed to know who answered each question.

It is very important that you read the questions and the alternatives of the answers carefully. You have just to tick an X in the answer you think it’s more appropriate. There’s no right or wrong answer. Answer the questions according to your experience, but all the alternatives have an answer.

It’s very important that you honestly answer the questions and do not leave any unanswered or blank question. The results of this survey will be useful for the health and education professionals to better know the behavior of the young people in order to improve the quality of their services.

If you don’t want to participate or answer some question, just leave it blank.
