The image depicts a bar chart titled "Statement Placement in News Article". The y-axis represents the number of statements, ranging from 0 to 12. The x-axis categorizes the statements into three sections: Beginning, Middle, and End.

- **Beginning**: Three bars are present, with the orange bar labeled "Explicit Limits of VMMC", the blue bar labeled "60% Reduction", and the green bar labeled "Abstinence".
- **Middle**: The chart shows multiple bars, similar to the beginning section, indicating a higher number of statements. The bars are color-coded for clarity:
  - Orange: "Explicit Limits of VMMC"
  - Blue: "60% Reduction"
  - Red: "Explicit Condom Promotion"
  - Green: "Abstinence"
- **End**: A single blue bar labeled "60% Reduction" is visible.

The chart visually represents the distribution of statements across different sections of the news article, highlighting the frequency and types of statements made in each part.
