Random sample  
$n = 7500$

Undeliverable:  
$n = 26$

Gross sample  
$n = 7474$

Non-responders:  
$n = 4744$

Responders  
$n = 2730$

Excluded:  
$n = 1229$
- 272 unemployed
- 644 part-time employment
- 97 self-employed
- 5 disability pension
- 211 missing data

Eligible from first survey  
$n = 1501$

Non-responders:  
$n = 628$
- 178 no consent to second survey
- 357 non-responders second survey
- 49 unemployed
- 44 missing data

Eligible from both surveys  
$n = 873$

Good or excellent  
WAI in 2009:  
$n = 600$

Moderate or poor  
WAI in 2010:  
$n = 79$

No ERI in 2009:  
$n = 666$

ERI in 2010:  
$n = 52$
