Adolescents included in the study (N = 302)

Adolescents who did not participate (N = 29)

Adolescents included in the concurrent validity study (N = 273)

Subsample included in the reliability study (N = 273)

Exclusions (N = 133)
- Technical problems with accelerometers (N = 62)
- Refused wearing (N = 13)
- Non-compliance (N = 58)

Adolescents providing valid data (N=140)

No data on convenience (N = 47)

Final analytical sample (N=93)

Adolescents providing valid data (N = 113)

No data on convenience (N = 24)

Final analytical sample (N = 89)
