Recruitment of services for homeless youth

Inclusion criteria are:
Delivering ambulant and/or residential care to at least 15-20 homeless youths each year for an average period of three months (not specifically at teenage mothers or in general to homeless adults)

T0: Baseline measurement

Allocation to control group \( (n = 5) \)
Care as usual

Allocation to intervention group \( (n = 5) \)
Houvast

Exclusion criteria are:
- Youths still living with their parents while receiving ambulant care
- Youths who end care within two weeks
- Youths who cannot be interviewed during the first two weeks

Randomisation at service level \( (n = 10) \)

T1: Second measurement
- Care ends
- Youth receive care for 6 months

T2: Third measurement
9 months after baseline measurement
