The graph shows the percentage correct for different topics in two groups: Group A (pre-test and post-test) and Group B (post-test). The topics include:

- Degree of protection
- Safe sex and infection
- Invitation without request
- Permission for vaccination
- Vaccination in spite of HPV vaccination
- Vaccination before pap-smear not necessary
- Vaccination and hair loss
- Sexual activity and vaccination
- Duration of protection
- Risk reduction in getting cervical cancer
- Risk reduction in dying of cervical cancer
- Costs of vaccination

The y-axis represents the percentage correct, ranging from 0 to 100%. The x-axis lists the topics.
