Figure 2: Age specific mean density of *Plasmodium falciparum* and prevalence of different parasite densities in the study respondents.

- **Legend:**
  - ▲ 100-500
  - ▼ >500
  - ▼ <100
  - ● Mean density

- **Axes:**
  - Y-axis: *P. falciparum* density (Parasites/µL blood)
  - X-axis: Age group (months)

- **Age Groups:**
  - <6
  - 6-12
  - 12.1-24
  - 24.1-60
  - 60.1-144
  - >144

- **Prevalence:**
  - 100-500
  - >500
  - <100

- **Data Representation:**
  - Bars indicate prevalence ranges.
  - Lines with error bars represent mean density.

This diagram illustrates the distribution of *P. falciparum* densities across different age groups, with a particular emphasis on the mean parasite densities and prevalence ranges.
