The chart shows the percentage distribution of secondary education attainment across different wealth quintiles. The y-axis represents the percentage range from 0% to 100%, and the x-axis indicates the wealth quintiles: Poorer, Middle, and Richest.

- In the Poorer quintile, 93% have less than secondary education, and 7% have secondary or more education.
- In the Middle quintile, 79% have less than secondary education, and 22% have secondary or more education.
- In the Richest quintile, 35% have less than secondary education, and 65% have secondary or more education.
