The graph shows the number of trips per hour at different times of the day for different types of services.

- **8 seats, direct**
- **8 seats, transfer**
- **4 seats, direct**
- **4 seats, transfer**
- **4 seats, not full**

The y-axis represents the number of trips per hour, and the x-axis represents the time of day from 0 to 24 hours.

The highest peaks are observed during business hours, with the highest number of trips occurring around midday.
