The graph illustrates the measure values for various behaviors related to adult and child items. The x-axis represents different behaviors such as 'Ate less', 'Decreased meals', 'Skipped meal', 'Ate less - main meal', 'Hungry', 'Went to bed hungry', 'Buy less staples', 'Skipped meals', 'Ate less - main meal', 'Hungry', and 'Went to bed hungry'. The y-axis represents the measure values ranging from -4 to 4.

Two lines are plotted: one for 'Only Child' (solid line) and another for 'Multiple Children' (dashed line). The graph shows a trend where 'Multiple Children' generally have higher measure values compared to 'Only Child' for most behaviors.
