Figure 1. Percentage of residents who believe the neighborhood is unsafe due to crime. Neighborhood crime events overlaid in green.

*Spearman Rank Correlation Coefficient*
\[ r = 0.50, \ p = 0.01 \]

Figure 1. Percentage of New Haven EPESE participants who perceived their neighborhood was unsafe due to crime in 1982. Green overlay represents crime events per census track in 1982. Neighborhoods are measured as individual census tracts. Census tracts are numbered 1401 – 1428. Tract 1401 = Central Business District.
